

Abdulaziz Barghouth

Full-Stack Developer | React & Node.js

azizbargoth@gmail.com | +963 991820491 | Al-Hasakah, Syria | GitHub: github.com/azizbargoth

PROFESSIONAL SUMMARY

Informatics Engineer and Full-Stack Developer with 8+ years of professional experience in database and systems development, plus hands-on full-stack web development experience. Skilled in building business applications and web solutions using React, JavaScript, Node.js, Express, C#, SQL Server, PostgreSQL, and MongoDB. Experienced across frontend interfaces, REST APIs, database design, authentication, reporting, and operational software. Strong background in solving real-world business problems and delivering practical applications for humanitarian and local-market clients.

TECHNICAL SKILLS

Languages: JavaScript, C#, C++, SQL

Frontend: React, React Router, Redux, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, Mongoose, PostgreSQL, SQL Server

Data & Reporting: Power BI, Excel, Power Query, DAX

Systems: IIS, Windows Server, LAN/network troubleshooting

Tools: Git, GitHub, Visual Studio, VS Code, npm, Vite

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer | Freelance / Team Projects | Aug 2022 – Present

- Collaborate with development teams to build full-stack web applications using React, JavaScript, Node.js, Express, HTML, CSS, and MongoDB.
- Develop reusable frontend components, responsive interfaces, backend services, REST APIs, database models, and business workflows.
- Work across the application stack from UI implementation and API integration to database design and backend logic.
- Apply software-development, database, and troubleshooting skills to build practical business-oriented solutions.

Database Management Officer | Blumont NGO | Oct 2018 – Apr 2026

- Designed and developed internal business applications using C# and SQL Server for humanitarian distribution, complaints management, and operational tracking.
- Designed database structures, wrote SQL queries, maintained data integrity, and developed reporting solutions for operational teams.
- Developed a standalone database solution for daily distribution operations and improved the speed and reliability of report generation.
- Diagnosed database and application issues and coordinated with UNHCR technical teams when external system support was required.
- Supported application infrastructure, local servers, workstations, and network connectivity to maintain system availability.
- Trained technical and data-entry teams on application use, data verification, and quality-assurance procedures.

Database Administrator / IT & Database Support | Al-Hasakah | 2014 – 2017

- Managed SQL Server databases, wrote queries, performed database updates, and supported application operations.
- Configured local networks, servers, workstations, and printers for database-driven applications.
- Set up networks across five centers in Al-Hasakah and Qamishli and configured terminals and network printers.
- Maintained local servers and databases and trained users on application operation and backup procedures.

Part-Time Instructor | Al-Furat University | 2014 – 2017

- Taught Database and Systems Analysis courses.
- Taught C++ programming and supervised student programming projects.

SELECTED SOFTWARE PROJECTS

SEF Academy – Full-Stack Web Application | | React, Node.js | 2024 — Developed a full-stack web application with frontend and backend components.

E-Commerce Platform | | React, Node.js | 2025 — Built a full-stack e-commerce solution covering user-facing interfaces and backend services.

Full-Stack Blog Platform | | React, Node.js | 2026 — Developed a complete blog application using modern frontend and backend technologies.

Mikrotik Customer Management & Billing System | | C#, SQL Server | 2019 — Developed a Windows application for customer management, billing, and MikroTik-related operations.

Mikrotik Hotspot User Management Tool | | C#, SQL Server | 2017 — Built a Windows tool for creating and printing hotspot users for local and remote customers.

College Management System | | C#, SQL Server | 2016 — Developed a desktop application for college management operations.

Sales Management System | | C#, SQL Server | 2015 — Developed a desktop sales-management solution.

DATA & BI PROJECTS

- Active Population & Address Dashboard — Power BI, SQL Server | Blumont | 2025
- Transportation Operations Dashboard — Power BI | Juhina Transportation Company | 2025
- Football Team & Player Dashboard — Power BI | 2025

EDUCATION

B.Sc. in Informatics Engineering – Computer Networks & Systems | University of Aleppo, Faculty of Informatics Engineering | 2009

CERTIFICATIONS

Full-Stack Developer (React & Node.js) | SEF Academy, Egypt | Sep 2023

Data Analysis Diploma | Information Technology – Online Course, Egypt | Feb 2025

LANGUAGES

Arabic — Native | English — Very Good | Kurdish — Familiar
